

# THOMPSON HYDRAULIC SAUSAGE FILLERS

The Thompson Sausage Fillers are efficient machines designed to maximize output in minimum time.

## THOMPSON HYDRAULIC SAUSAGE FILLERS

The Thompson Oil Hydraulic Sausage Fillers are Hygienic smooth running knee-operated machines. Release of the knee control automatically stops the filling process. The large barrel diameter makes it easy to fill the sausage meat into the chamber. A quick release twist lock lid ensures fast refill time... no time consuming lock down threads! For ease of cleaning, the lid and stainless steel barrel are totally removable.

### CONSTRUCTION

High quality stainless steel. The lid, plunger, barrel and 3 locking bars are manufactured from high quality stainless steel. Only top quality heavy duty components are used in manufacture, this reduces the risk of breakdown and extends the life of your investment.

Model / Capacity	Height	Diameter	Weight	Motor	Shipping Weight	Volts
27kg	1300mm	500mm	200kg	.75kW 1 hp	240kg	415V 3 phase
20kg	1150mm	500mm	180kg	.75kW 1 hp	220kg	415V 3 phase
