Thompson Mincers are compact, hygienically designed machines capable of providing a cool, efficient mincing action without squashing or pulping the product. Thompson Meat Machinery offers a choice of different styles in both appearance and working capacities that enable the machines to process a variety of products, they have the capabilities to produce 2500kg/hr of minced meat. The compact pedestal mincer uses only 700mm x 800mm of floor area (excluding barrel and other accessories). Various options allow this machine the flexibility to adapt to any array of applications.

CONSTRUCTION

High quality stainless steel, gear transmission, stainless steel barrel and feedscrew available upon request. Pneumatic foot control available to assist filing trays for display.
