## ENGINEERING

1

### ENGINEERED PROCESSING ROOM SOLUTIONS

We can help you in the design, manufacture and installation of engineered products and solutions for your processing room. We also work together with reputable part suppliers to always provide high quality products.

2

### PROCESSING ROOM LAYOUT SUPPORT

Speak to our engineering team about the best options for you. We can help you with consultancy support and 3D processing room layout engineering drawings.

3

### ENERGY CONSULTING

We can help you to reduce energy requirements by assessing your power requirements for packaging machines and vacuum pump systems. Call us today to make an appointment for assessing your potential savings.

4

### INDIVIDUAL ENGINEERING SOLUTIONS

We offer individual designed packaging solutions according to your packaging requirements for new and existing equipment.

# StarVac Systems

StarVac Systems is an innovative manufacturing company, who designs and builds high-speed fully automatic vacuum packaging machines and systems for the food processing industry. StarVac Systems offers complete customer solutions inclusive consumables for the packaging process.
